ECCO 15LM12

\$135.00

Replacement pump for SU AUF 300/AZX 1300 series pumps

Specifications

12 volts
Positive or Negative Earth
1.5 litres per minute flow
3 – 4 psi
Self Regulating
Solid State Electronics

The ECCO™ 15LM12 Diaphragm Pump is loosely styled on the original SU type electric fuel pump. It is a universal replacement fuel pump and has been specifically designed to suit as wide a scope of applications as possible. The 15LM12 Diaphragm Pump would generally be used as a replacement fuel pump on carburetted vehicles that have 4 – 6 cylinder engines and a fuel requirement of up to 1.5 Litres per minute. Typically, these vehicles could be described as large cars with larger than average engines and a higher than normal fuel requirement.

Search...

Quickfind a pump type

HOW TO SEARCH : Type your car manufacturer into the search bar (above - i.e. 'Holden') and hit enter on your keyboard.

Click on the [Read more...](#) link, to be taken to the table or web page which lists the suggested fuel pump to fit your model.

For a more detailed search, 'View all Results' or change the 'Search Parameters'.

To print a specific table, click the print icon to the right of each table to bring up a pop-up window ready to print.

To browse all tables, scroll down to the foot of the [main 'Application' page](#) and continue to the next page.
