HI Price, hope this is clear. This is the bottom. The lip goes against the crossmember and fastens with 2 sheetmetal screws. the hole is for the radiator drain. The front rests on the lip of the shroud. Aloha, Kimo

I have a sheetmetal plate [ 17" x 14" ] from the shroud to the crossmember. This keeps the air entering the grill from going down under the car and directing it thru the radiator. i saw it on a works rally car. I have no cooling problems. Aloha, Jim
